PROJECTS

Speedrun To Diabetes - *Solo Project*

April 2025 - Present

As the sole developer, I managed the entire lifecycle of this hypercasual game, from concept to a polished and playable prototype. My goal was to deepen my C# programming skills and apply computer science fundamentals to create a complete and rewarding user experience.

- Designed and programmed the core hypercasual gameplay loop, focusing on a fast-paced, addictive experience.
- Developed a procedural object spawner using the Factory design pattern and weighted probabilities for balanced and dynamic gameplay.
- Implemented a flexible power-up system (Shield, Double Points) using abstract classes for scalability.
- Created a local high-score table with a trophy system (gold, silver, bronze) to drive player retention and replayability.
- Redesigned player input to an intuitive swipe/drag system, improving UX on mobile & PC.

Nara: Tower Defense - *Lead Unity Developer*

July 2025 - August 2025

Stepped up to lead all programming efforts for this mobile tower defense game following the departure of the technical team, ensuring the project met critical presentation deadlines.

- Single-handedly designed and implemented the complete UI, audio, localization, and narrative systems in Unity (C#).
- Architected a scalable ComicManagerBase class, enabling the modular addition of new levels and content.
- Pitched and designed a pivotal gameplay redesign, transforming the project's concept into a functional Tower Defense game.

Chemical Engineer - *Level Designer & UI*

August 2024 - September 2024

- Prototyped level design and user experience for this PC title using Unreal Engine.
- Took ownership of level design, 3D world lighting, and the implementation of the graphical interface and sound.

Gamified Project for Client - *Unity Developer & Game Designer*

July 2024 - August 2024

Developed a gamified mini-game for a client project, focusing on narrative logic and user interaction.

- Designed and programmed the core puzzle mechanic, which required players to sort a list of items into a narratively coherent order.
- Implemented the UI, sound system, and core game logic, collaborating with the team to integrate the feature into the main application.

Súper Libia - *Game Programmer & Technical Artist*

March 2023 - April 2023

- Designed and implemented clicker-style game mechanics and contributed to the UI implementation.
- Animated and rigged the main character using Unity's 2D tools.
- Developed a custom shader effect for a key character, enhancing the game's visual feedback.

Bota Bota - *Game Designer & 3D Artist (Game Jam Project)*

November 2022 - December 2022

- Developed the Game Design Document and established the project's visual aesthetic through art style reference boards.
- Built and tested the 3D game environment in Unity, gathering feedback to iterate on level design.

Lavender Latte - *Sound Director & Render Supervisor (Academic 3D Short Film)*

February 2022 - June 2022

- Directed the sound design for this animated short, defining the auditory experience.
- Supervised the 3D rendering pipeline, ensuring technical quality and consistency for the final visuals.

Zonus - *Art Director & Sound Designer (Academic Game Project)*

August 2021 - November 2021

- Led the art direction for the project, with a focus on artistic level design.
- Designed and edited the complete soundscape for the game, while also contributing to marketing efforts.

EDUCATION

Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM)

Graduated 2022

Bachelor of Arts, Digital Art

- Specialization in Animation and Game Development.

UT-HUB

Graduated 2023

- Epic Bootcamp: Animation in Unreal Engine.

Harvard University (via edX)

In Progress

- CS50's Introduction to Computer Science

SKILLS

Languages: C# (Proficient), C (Basic) & Unreal Blueprints (Basic).

Engines & Software: Unity, Unreal Engine, GitHub, Visual Studio, Maya, Adobe Creative Suite (Photoshop, Premiere, After Effects), Miro, Trello & Notion.

Development Skills: Game Design, System Architecture, Gameplay Scripting, UI/UX Implementation, Level Design (Blockout).
