EXPERIENCE

Tlachi Games - *Lead Unity Developer & Co-Founder*

February 2023 - Present

- Assumed lead development responsibilities for Nara: Tower Defense, designing and implementing the complete UI, audio, localization, and comic systems in Unity (C#) after a team restructuring.
- Designed and pitched a core gameplay pivot for Nara, successfully transforming the project's concept from an educational app into a functional Tower Defense game.
- Managed and executed digital marketing campaigns on Google Ads and Meta to attract playtesters, analyzing performance metrics to provide critical insights on audience engagement.
- Designed game mechanics and user experience for Chemical Engineer using Unreal Engine, responsible for level design, 3D world lighting, and UI/sound implementation.
- Collaborated with the art team on Súper Libia to implement 2D animations, rigging, and VFX within the Unity engine, while also balancing core game design elements.
- Developed the Game Design Document and established the visual aesthetic through art style reference boards for the game jam project Bota Bota.

PROJECTS

Speedrun To Diabetes - *Solo Project*

April 2025 - Present

As the sole developer, I managed the entire lifecycle of this hypercasual game, from concept to a polished and playable prototype. My goal was to deepen my C# programming skills and apply computer science fundamentals to create a complete and rewarding user experience.

- Designed and programmed the core hypercasual gameplay loop, focusing on a fast-paced, addictive experience.
- Developed a procedural object spawner using the Factory design pattern and weighted probabilities for balanced and dynamic gameplay.
- Implemented a flexible power-up system (Shield, Double Points) using abstract classes for scalability.
- Created a local high-score table with a trophy system (gold, silver, bronze) to drive player retention and replayability.
- Redesigned player input to an intuitive swipe/drag system, improving UX on mobile & PC.

EDUCATION

Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM)

Graduated 2022

Bachelor of Arts, Digital Art

- Specialization in Animation and Game Development.

UT-HUB

Graduated 2023

- Epic Bootcamp: Animation in Unreal Engine.

Harvard University (via edX)

In Progress

- CS50's Introduction to Computer Science

SKILLS

Languages: C# (Proficient), C (Basic) & Unreal Blueprints (Basic).

Engines & Software: Unity, Unreal Engine, GitHub, Visual Studio, Maya, Adobe Creative Suite (Photoshop, Premiere, After Effects), Miro, Trello & Notion.

Development Skills: Game Design, System Architecture, Gameplay Scripting, UI/UX Implementation, Level Design (Blockout).
