PROFESSIONAL SUMMARY

Game Developer with 3+ years of experience and a dual background in Digital Arts and Software Engineering (CS50). Specialized in Unity and C#, with a proven track record of bridging the gap between artistic vision and modular, scalable code. Expert in project recovery and rapid prototyping, having successfully led technical teams and delivered solo projects under tight deadlines.

PROJECTS

Flux - Solo Project

November 2025

- Developed a minimalist arcade experience focusing on Game Juice and feel.
- Programmed custom screen-wrapping logic and dynamic player-growth mechanics in C#.

The Last Potato - Solo Project

October 2025

Developed a time-manipulation prototype in 48 hours for the Unity 20th Anniversary Jam, focusing on rapid system integration.

- Architected a complete time-manipulation system and gameplay loop in under 48 hours.
- Ranked in #243 of the Unity Game Jam, demonstrating high-speed delivery and technical autonomy.
- Managed the full production pipeline: from system logic to final WebGL deployment on itch.io

Nara: Tower Defense - Lead Unity Developer

July - August 2025

Stepped up to lead all programming efforts following a team restructuring, ensuring delivery for critical deadlines.

- Single-handedly designed and implemented the UI architecture, localization pipeline (3 languages), and narrative comic systems.
- Optimized gameplay systems and integrated audio/VFX to reach a polished, shippable state.

Speedrun To Diabetes - Solo Project

April - September 2025

A solo-dev exercise in clean architecture and design patterns.

- Engineered a modular procedural object spawner using the Factory Design Pattern to ensure scalable and balanced gameplay.
- Refactored the input system for cross-platform compatibility (Mobile/PC) and implemented a persistent local high-score system.

Súper Libia - Game Programmer & Technical Artist

March - April 2023

- Implemented core clicker-style gameplay mechanics and contributed to UI design.
- Managed the 2D technical art pipeline, rigging and animating characters within Unity and developing a custom shader to enhance visual feedback.

EDUCATION

Instituto Tecnológico y de Estudios Superiores de Monterrey (ITESM)

August 2016 - December 2022

Bachelor of Arts, Digital Art

- Specialization in Animation and Game Development.

UT-HUB

May - June 2023

- Epic Bootcamp: Animation in Unreal Engine.

CS50x Introduction to Computer Science – Harvard University

August 2025 - February 2026

- Focus: C, Python, Data Structures, and Algorithmic Thinking.

SKILLS

Languages: C#, Unity Visual Scripting (Basic understanding), Unreal 5 Blueprints (Basic understanding) and Python.

Game engines & Software: Unity, Unreal Engine, GitHub, Visual Studio, VS Code, Maya, Adobe Creative Suite (Photoshop, Premiere, After Effects), Miro, Trello & Notion.

Development Skills: Game Design, System Architecture, Gameplay Scripting, UI/UX, Level Design.
